

Introducing...
AIRT's new Senior Thermography
Training Professional, Level I, II, III Certified:
Ron Predmesky
Formerly of Ford Motor Company

Ron Predmesky has 32 years in infrared inspection and research at Ford Motor Company. His experience includes: tire testing, infrared weld inspections (spot, stir friction and ultrasonic), process control, Ford GT heat management, brake inspection, composite structures inspection, adhesives inspection, and building facilities operations. He served as chairman of Ford Infrared Users Group and also as an instructor for Level I and II infrared certification classes.

We welcome Ron and his fantastic experience to the AIRT Instruction team!
